

- For use with 10-stage PMTs that fit standard 14-pin sockets
- Built-in low-noise preamplifier and focus control
- Both preamplifier output and anode output
- Test input for system testing
- Protection circuit for internal transistors

The ORTEC Model 276L Low-Power Photomultiplier Tube Base and Preamplifier incorporates an integral low-noise preamplifier, a PMT base with a low-power voltage divider network, and a focus control for optimum performance in scintillation detector applications. The unit is ideally suited for use with NaI(Tl) detectors.

The Model 276L provides two outputs: the preamplifier output for energy analysis and the anode output for either timing or auxiliary energy analysis. The preamplifier is dc-coupled to simplify pole-zero cancellation in the main amplifier. A Test input accepts the output of a pulse generator to calibrate and test the preamplifier and the system. The Model 276L has a diode protection

network to prevent damage to the internal transistors due to sudden application or removal of high voltage to the unit. The Model 276L is powered from any ORTEC main amplifier or preamplifier power supply.

The Model 276L is directly compatible with many commercially available integrated NaI-PMT assemblies including:

- ORTEC Model 905-2, -3, -4 NaI(Tl) Scintillation Detector Assemblies;
- Bicron Model 2M2 and 3M3 Monoline Spectrometers;
- Harshaw Model S288 and S332 Integral Line Assemblies;
- Teledyne S-88-I and S-1212-I Integral Assemblies.

Also, the Model 276L is directly compatible with 10-stage PMTs that fit standard 14-pin sockets including those listed in Table 1.

The Model 276L is also compatible with other 10-stage tubes not listed in Table 1 (see Fig. 1). Compatibility may be determined by comparison with those listed.

## Low-Power Photomultiplier Base

### Specifications

#### PERFORMANCE

##### PREAMPLIFIER

**Integral Nonlinearity**  $\leq \pm 0.02\%$ , 0 to +10 V.

**Temperature Instability**  $\leq \pm 0.005\%/^{\circ}\text{C}$ , 0 to  $50^{\circ}\text{C}$ .

**Output Rise Time**  $< 100$  ns for test input or fast scintillator.

**Output Fall Time** Time constant of  $50 \mu\text{s}$ .

**Output Noise**  $< 50 \mu\text{V}$  rms with ORTEC main amplifier such as Model 672 and time constant of  $1 \mu\text{s}$ .

**Conversion Gain** Nominally  $5 \mu\text{V/eV}$  with 2-by 2-inch NaI(Tl) crystal and PMT gain of  $10^6$ ; the typical output for a 511-keV gamma ray will be 250 mV at a PMT gain of  $10^6$ .

**Saturation Level** +10 V into an open circuit; +5 V into  $93\text{-}\Omega$  load.

**VOLTAGE DIVIDER** Resistor-divider connected to 10-stage PMT base. Total resistance  $5.6 \text{ M}\Omega$  resulting in bleeder current of  $200 \mu\text{A}$  with typical high voltage of 1 kV. The distribution is linear to all stages with the focus adjustment on the grid.

#### CONTROL

**FOCUS** Single-turn locking potentiometer on panel for external adjustment of PMT grid potential.

#### INPUTS

**POS HV** SHV connector, AMP 51494-2, for distribution of positive high voltage to PMT base; +2000 V maximum.

**TEST** BNC connector, accepts pulses from an ORTEC pulse generator for testing and calibration.

**SIGNAL** Preamplifier input is connected internally to dynode 10.

**POWER** Captive 4-m (12-ft) power cable terminated in Amphenol 17-20090 connector accepts preamplifier operating power; compatible with all ORTEC main amplifiers and the Model 4002P Portable Power Supply.

**PMT SOCKET** TRW 3B14. Fits JEDEC B14-38 PMT pin base (see Fig. 1).

#### OUTPUTS

**PREAMP** BNC connector furnishes preamplifier positive output pulse to any ORTEC main shaping amplifier for linear energy analysis;  $Z_o = 93 \Omega$ , dc-coupled.

**ANODE** BNC connector furnishes negative anode output pulse for use for either timing or auxiliary energy analysis;  $Z_o = 1 \text{ k}\Omega$  ac-coupled.

#### ELECTRICAL AND MECHANICAL

**POWER REQUIRED** For preamplifier, +24 V, 16 mA; -24 V, 16 mA; for PMT base, +2000 V maximum (use rated voltage for the tube that is installed).

#### WEIGHT

**Net** 0.65 kg (1.5 lb).

**Shipping** 1.3 kg (3.0 lb).

**DIMENSIONS** 5.6 cm (2.2 in.) diameter x 10.2 cm (4 in.) long; equipped with 4-m (12-ft) captive power cable.

### Ordering Information

To order, specify:

Model	Description
<b>276L</b>	Low-Power Photomultiplier Base with Preamplifier
<b>C-36-12</b>	RG-59A/U $75\text{-}\Omega$ Cable with two SHV female plugs, 12-ft length
<b>C-24-12</b>	RG-62A/U $93\text{-}\Omega$ Cable with two BNC male plugs, 12-ft length
<b>T50</b>	$50\text{-}\Omega$ Terminator, BNC
